C O N T E N T S

1 *Introduction*

Course objectives	1-2
Course content	1-3
Course materials	1-4
Additional materials and resources	1-5
ESRI Support Center	1-6
ArcGIS: a complete GISFor using, serving, authoring and GIS knowledge	1-7
Logistics	1-8
Introductions	1-9
Exercise 1 goals	1-10

2 *Working with layers and map symbology*

Lesson overview	2-2
Creating quantitative displays	2-3
Choosing a classification method	2-4
Grouping values into classes	2-5
Using natural breaks	2-6
Using quantile and equal interval	2-7
Using standard deviation	2-8
Excluding features from a classification	2-9
Show the ratio between two quantities	2-10
Showing quantity for point locations	2-11
Displaying multiple attributes	2-12
Showing quantity with dot density	2-13
Symbology	2-14
Styles	2-15
Using the Style Manager	2-16
Creating custom symbols	2-17
Creating custom lines and markers	2-18
Using symbol levels for cartographic effects	2-19
Using layer masks	2-20
Additional layout techniques	2-21
Ways to create a map	2-22
Building templates	2-23
Changing templates	2-24
Exercise 2 overview	2-25
Lesson 2 review	2-26

3 *Working with labels and annotation*

Lesson overview	3-2
Labels versus annotation	3-3
Labeling Toolbar	3-4
Accessing Label Properties	3-5
General label rules	3-6
Point placement	3-7
Line placement	3-8
Polygon placement	3-9
Label locking	3-10
Label visibility	3-11
Labeling with an expression	3-12
Labeling features differently	3-13
Setting reference scale	3-14
Creating annotation	3-15
Storing annotation	3-16
Annotation toolbar	3-17
Unplaced annotation	3-18
Exercise 3 overview	3-19
Lesson 3 review	3-20

4 *Displaying locations from tabular data*

Lesson overview	4-2
What is geocoding?	4-3
The geocoding process	4-4
Creating an address locator in ArcCatalog	4-5
Field mapping to the address locator style	4-6
Address locator properties	4-7
Adding an address locator in ArcMap	4-9
Geocoding a table	4-10
Unmatched records	4-11
New fields in the output point feature class	4-12
Finding an address with the Find tool	4-13
Adding XY data in ArcMap	4-14
Exercise 4 overview	4-15
Lesson 4 review	4-16

5 *Modifying the ArcGIS interface*

Lesson overview	5-2
Why modify the interface?	5-3
Saving and accessing your customizations	5-4
Introducing the Customize dialog box	5-5
Instructor's demo	5-6
Exercise 5 overview	5-7

6 *Designing a GIS database*

Lesson overview	6-2
The database design procedure	6-3
Assessing needs	6-4
Conceptual and logical design	6-5
Determining the data storage format	6-6
Why the geodatabase?	6-7
Physical design	6-8
Database schema	6-9
Choosing a projection	6-10
Automation plan	6-11
Pilot project	6-12
Metadata: Documenting data	6-13
Types of metadata	6-14
Viewing metadata	6-15
Editing metadata documentation	6-16
Setting metadata properties	6-17
Metadata import and export	6-18
Exercise 6 overview	6-19
Lesson 6 review	6-20

7 *Populating the geodatabase*

Lesson overview	7-2
Many spatial data automation options	7-3
Creating new data	7-4
Georeferencing your data	7-5
Spatial reference	7-6
Resolution	7-7
Tolerance	7-8

Creating new data	7-9
Creating a new feature class in ArcCatalog	7-10
Defining feature class properties	7-11
Setting the spatial reference	7-12
Creating feature datasets (FDS)	7-13
Digitizing in ArcMap	7-14
Exercise 7A overview	7-15
Lesson overview	7-16
Converting digital data	7-17
Importing data into the geodatabase	7-18
ArcCatalog Simple Data Loader	7-19
Transferring data from GPS	7-20
Importing data from the Internet	7-21
Defining or changing projection	7-22
Exercise 7B overview	7-23
8 <i>Setting geodatabase validation rules</i>	
Lesson overview	8-2
Introducing subtypes and domains	8-3
Anatomy of a subtype	8-4
Setting subtypes	8-5
Editing with subtypes	8-6
Domains	8-7
Anatomy of a domain	8-8
Setting domains	8-9
Editing coded value domains	8-10
Range domains in ArcMap	8-11
When to use subtypes or a domain?	8-12
Exercise 8A overview	8-13
Lesson overview	8-14
Topology	8-15
Topology manages spatial integrity	8-16
Creating a topology	8-17
Cluster Tolerance	8-18
Ranks	8-19
Topology rules	8-20
Three states of a topology	8-21
Validating a topology	8-22
Topology errors and their management	8-23
The Error Inspector	8-24

The Fix Topology Error tool	8-25
Working with geodatabase topology	8-26
Exercise 8B overview	8-27

9 *Editing spatial and attribute data*

Lesson overview	9-2
Editing security	9-3
The Editor toolbar	9-4
Sketches	9-5
Editing attributes	9-6
Feature creation tools	9-7
Split and Divide	9-8
Buffer	9-9
Copy Parallel	9-10
Union and Intersect	9-11
Merge	9-12
Editing topologies in ArcMap	9-13
Editing with the Error Inspector	9-14
Coincident geometry	9-15
Moving coincident geometry	9-16
Topology Edit Tasks	9-17
Create polygons from lines	9-18
Intersecting lines	9-19
Map topology	9-20
Topology tools availability	9-21
The Map Topology tools	9-22
Exercise 9 overview	9-23

10 *Spatial adjustment*

Lesson overview	10-2
Why use spatial adjustment?	10-3
Spatial adjustment	10-4
Transformation	10-5
Transformation methods	10-6
Creating displacement links	10-7
RMS error	10-8
Rubbersheeting	10-9
Edge Snap	10-10

Attribute transfer	10-11
Aggregating spatial data	10-12
Georeferencing Toolbar	10-13
Exercise 10 overview	10-14

11 Spatial analysis functions and geoprocessing

Lesson overview	11-2
What is geoprocessing?	11-3
Accessing geoprocessing functionality	11-4
Executing tools	11-5
Command Line usage	11-6
Environment settings	11-7
Lesson overview	11-8
Dissolving features	11-9
Clipping features	11-10
Spatial analysis functions	11-11
Buffering	11-12
Finding the nearest feature	11-13
Overlay analysis	11-14
Overlay analysis functions	11-15
Union	11-16
Intersect	11-17
Identity	11-18
Exercise 11A overview	11-19
Lesson overview	11-20
The analytical process	11-21
Analysis options	11-22
Introducing the ModelBuilder	11-23
Types of models	11-24
Why use ModelBuilder?	11-25
Using ModelBuilder	11-26
Exercise 11B – C overview	11-27

12 Course conclusion

Course objectives	12-2
ESRI educational support	12-3
Where do you go from here?	12-4
Learning pathways	12-5
Course evaluation	12-6
Thank you for attending	12-7
